

Warrior Super™

Emamectin benzoate 2% + *Sophora flavescens* Plant Extract 25%

Contact and stomach insecticide for the control of Lepidoptera pests, Thrips and Spidermites on a wide range of crops.

A unique mix of pure plant extract and a fermentation product.

Warrior Super™ characteristics

- Highly effective
- Versatile mode of action: contact, stomach, repelling and anti-feeding activity
- Unique chemistry; no cross-resistance known to other types of insecticides
- Special formulation for easy mix
- Not phytotoxic at the recommended rate
- Translaminar action

Active ingredients

Emamectin-benzoate is a natural product obtained from soil micro-organisms. Emamectin-benzoate has translaminar action, easily absorbed in plant tissues and ingested by larvae and sucking insects. Acts by interfering with the pest's nervous system, causing them to lose cell function and stop feeding.

***Sophora flavescens* Plant Extract**, a natural plant derivative, has a broad-spectrum activity on spidermites, soft-body insects and lepidoptera pests. *Sophora flavescens* has contact and stomach action, with additional anti-feeding and repelling activity.

Application rates and pests

CROP	PESTS	APPLICATION RATES
Ornamentals	Lepidoptera pests and Loopers, Leafminers, Thrips, Spidermites	250 - 300 ml / Ha
Vegetables (Peppers, Tomatoes, Cruciferae, Carrots, Paprika, Eggplants)	Tuta absoluta, Leafminers, Lepidoptera pests, Spidermites, Thrips	250 - 300 ml / Ha
Potatoes, Beans	Colorado beetles, Potato tuber moths, Thrips, Lepidoptera pest, Spidermites, Leafminers	250 - 300 ml / Ha
Maize	Maize stalk borers, Thrips, Leafminers, Spidermites, Fall armyworm	300 - 400 ml / Ha

Field trials

Extensive field research has proven the efficacy of **Warrior Super™** against a range of pests. Field results are depicted in the following graph:

Application timing:

Warrior Super™ is recommended to be applied upon the pest appearance. Ensure thorough coverage of the canopy with the spraying mixture.

Directions for use:

Warrior Super™ should be mixed with water to be ready for use. It may be applied with any type of spraying equipment.

Always alternate with insecticides with different modes of action throughout the season to prevent the development of resistant pest.
